How Doctors Think.

- By Jerome Groopman MD
- Publisher: Mariner Books; 1st edition
- ISBN-10: 0547053649

Jerome Groopman, a physician at Harvard Medical School who is also a writer for the New Yorker, does not debunk the notion of medical "exceptionalism." His book contains all kinds of smart, often selfless, occasionally heroic doctors making good decisions and sometimes saving lives. But it is far from a narcissistic paean to his profession. It is an effort to dissect the anatomy of correct diagnosis, successful treatment and humane care -- and also of diagnostic error, misguided therapy and thoughtless bedside manner. His task is to offer practical advice to both patients and physicians. He succeeds at both.
