Required Equipment & Materials

Students are required to be appropriately prepared for the medical school curriculum. Details are in the Basic Sciences Student Handbook. Below are the key materials and equipment required:

**Basics**

Notebooks, binders, copy-paper, clear envelopes for handouts, pens, pencils, colored pencils, highlighters, index cards, etc. Although most supplies are available on Saba, purchasing items on Saba is relatively more expensive. For convenience and economy purposes, it is suggested that you purchase your basics at your local office supply store.

**Hospital Scrubs**

Students will need a minimum of two (2) sets of scrubs. One set is reserved for Gross Anatomy and one for Physical Diagnosis & Introduction to Clinical Medicine. You may have your name sewn over the left pocket if you desire.

**Rubber Gloves**

Three to four boxes of latex medical examining gloves for Anatomy and Physical Diagnosis classes

**Dissecting Kit**

Any basic kit will do. Bring plenty of extra blades of different sizes.

**Laptop or PC**

Students should bring a laptop or PC with standard operating features that can be incorporated into a networking system. Systems should have Windows XP or 2000 and have a USB port. Surge protector – printer optional. Macintosh systems can be used, but not recommended since there is no support on campus.

**Items required for third, fourth & fifth semesters**

- Stethoscope
- Long Cotton Swabs
- Eye Chart
- Tongue Depressors
- Reflex Hammer
- Tuning Fork
- Carrying Case
- Blood Pressure Cuff
- Pen Light
- Ophthalmoscope
- Fourth & Fifth Semester:(2-3 short lab coats and short-white coat for Graduation Ceremony (Fifth Semester)
